📅 15+ yrs • ERP • Docker • Linux • Cloud-in-progress • AI-curious

Key Skills

PHP Python JavaScript / jQuery

SQL Swift (iOS) HTML & CSS

Docker Traefik Git

Ubuntu/Debian Nginx / Apache

MariaDB/MySQL ERP & invoicing

Security hardening Azure (learning)

AWS (learning)

Languages

Hungarian — Native

English — Professional Working Proficiency

Education

Dennis Gabor University

BSc — Information Technology
2002 – 2008

Present & Future

- Pursuing **Azure & AWS** certifications
- Building cloud-ready, containerized apps
- Exploring **AI-assisted** solutions

Profile

Experienced IT Manager and Full-Stack Developer with a proven record designing ERP systems, operating secure Linux servers, and shipping reliable web apps. Comfortable across the stack, from infrastructure and networking to databases and front-end. Focused on practical, secure, and maintainable solutions. Currently deepening cloud expertise (Azure, AWS) and experimenting with AI integrations.

Professional Experience

2012 – Present Quit Comp Ltd — Software Developer, Owner & CEO

SMB IT solutions • Custom ERP • Web apps • DevOps

- Designed and deployed **custom ERP** systems improving operational efficiency for clients (automation, invoicing, reporting).
- Built and maintained **secure Ubuntu/Debian** servers with **Docker/Traefik**, achieving high availability and isolation.
- Developed **full-stack** applications (PHP, Python, SQL) optimized for performance and usability.
- Implemented **backup** and **monitoring** processes; reduced incidents and recovery times.

2006 – 2015

Hertz Mercur Rent a Car Ltd — IT Manager & Project Manager

Infrastructure • Support • Data • Security

- Managed IT for **90+ employees** in an international environment; delivered dependable support and continuity.
- Engineered Linux servers (Nginx/Apache, MariaDB) with **security hardening** and **remote access** capabilities.
- Created reporting pipelines from **IBM iSeries (AS/400)** data to empower business decisions.
- Rolled out **IP telephony**, **cloud** services, and remote desktop to enhance collaboration.
